MAXIMIZING YOUR BOI TAX INCENTIVE

Manage your BOI project With Maximum Tax Planning Opportunities

Key Benefits

- ↪ Update with the BOI on the available tax incentives under the current investment promotion scheme, new BOI campaign for target industries and other measures from the BOI for boosting the investment in 2010
- ↪ Proper understanding on BOI import duty incentives for machinery & equipment (including mold & dies, jig and fixtures); and raw & essential materials (both for export and domestic sale)
- ↪ Comparing the other import duty incentives with the BOI incentives related to the import duty and planning on the using of import duty incentives
- ↪ How to make the full advantage of BOI incentive on corporate income tax
- ↪ How to manage multi-projects for both BOI vs. Non-BOI and multi-BOI projects
- ↪ How to maximize the benefits of loss carried forward under the BOI project(s)
- ↪ Planning on dividend payment
- ↪ Recent BOI ruling, tax ruling and court decision relating to the BOI corporate income tax incentive
- ↪ Tax planning on the using of BOI corporate income tax incentives
- ↪ Practical cases and recommendation from the tax expert.

The Board of Investment launched a special campaign for boosting an investment in Thailand since 2008 and extended certain part of this program until present. This special campaign offers the maximum tax incentives for the target industries and activities to convince the investor to make an additional investment within a limited deadline.

In reality, many companies cannot take a full advantage from various benefits offered by the BOI as they may not aware of the special program launched by the BOI or do not fully understand the scope of BOI tax incentives or do not know how to apply the BOI incentives they have in practice.

Therefore, to update you on the current BOI promotion scheme and help you to make a proper planning for maximizing your company's BOI incentives, IRVING is proudly to provide an interesting full day seminar .
